Loft Ladder For Ceiling

Loft Ladder For Ceiling

A **ceiling loft ladder** is a type of retractable or foldable ladder designed for accessing lofts or attics in a home or building. It is typically installed in the ceiling and can be extended when needed to provide access to the space above. These ladders are often used in homes with limited space, as they can be tucked away out of sight when not in use, allowing for better utilization of the living area.

The ladder usually folds up or slides into the ceiling, and it can be easily pulled down when required. Some ceiling loft ladders are manual, while others may be motorized for ease of use. They are made from durable materials like wood, aluminum, or steel,

ensuring safety and longevity.

Ceiling loft ladders are commonly used in situations where a permanent staircase is not feasible, making them a practical solution for accessing overhead storage areas.

Model:				Parameter:	
Type	Size	Storey	Weight	Maximum loading	200KG
L-01	700×800	2000-3100	45KG	heat transmission coefficient U	1.1W/m2K
L-02	700×900	2000-3100	50KG	Frame Height	140mm
L-03	700×1000	2000-3100	50KG	Insulation Length	400mm
L-04	700×1200	2000-3100	50KG	Insulation Width	100mm
L-05	600×900	2000-3100	45KG	Insulation Thickness	30mm
L-06	600×1200	2000-3100	50KG	Insulation Quantity	11 踏
				Atch thickness	36mm
				Hole thickness	220mm
