Loft Ladder For Wall

Loft Ladder For Wall

A **wall loft ladder** is a type of retractable or folding ladder designed to provide access to a loft or attic space. It is typically installed on or against a wall, often in a space where there isn't enough room for a permanent staircase. These ladders are space-saving and can be pulled down when needed and stowed away when not in use.

There are different types of wall loft ladders, including:

- 1. **Folding Wall Ladders:** These ladders fold up against the wall when not in use, making them a compact and discreet option for attic access.

2. **Telescoping Wall Ladders:** These ladders extend in sections, sliding out from the wall when needed.
3. **Retractable Wall Ladders:** These ladders retract into a compartment, often integrated into the ceiling or wall, and are pulled down when required.

Wall loft ladders are commonly made from materials like wood, aluminum, or steel, depending on the weight capacity and aesthetic needs. They are often found in homes, apartments, and buildings with limited space.

Model:				Parameter:	
Type	Size	Storey	Weight	Maximum loading	200KG
L-01	700×800	2000-3100	45KG	heat transmission coefficient U	1.1W/m2K
L-02	700×900	2000-3100	50KG	Frame Height	140mm
L-03	700×1000	2000-3100	50KG	Insulation Length	400mm
L-04	700×1200	2000-3100	50KG	Insulation Width	100mm
L-05	600×900	2000-3100	45KG	Insulation Thickness	30mm
L-06	600×1200	2000-3100	50KG	Insulation Quantity	11 踏
				Atch thickness	36mm
				Hole thickness	220mm
